**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Chelehmah et al (U.S. Pub No. 2002/0046406A1).

3. A display system comprising: a control computer having a source server module, an interface manager and a user server module; a display computer having a display server agent and a gateway host for communicating with said control computer (page.1, paragraph.9 & paragraph.17, page.2, lines 3-9); and a video wall, coupled to said display computer (paragraph.17, page.2, lines 11-14).

4. The display system of claim 1, further comprising: a source computer having a remote control agent and a gateway host for communicating with said control computer (paragraph.23, lines 20-25), wherein said source computer further having at least one data source that is accessible by said interface manager to be displayed on said video wall (paragraph.24).

Art Unit: 2143

5. The display system of claim 1, further comprising: a remote control computer having a remote manager and a gateway viewer for communicating with said control computer for accessing said interface manager of said control computer (paragraphs 27 & 28).

6. A display system comprising: a manager computer having a source server module and a user server module; a control station for communicating with said manager computer, said control station having a plurality of displays; and a source computer for communicating with said manager computer, wherein said source computer having at least one data source that is accessible by said source server module to be displayed on at least one of said displays of said control station (paragraphs.25 & 17).

7. A method for displaying a data source on a large-scale display, said method comprising the steps of: a) composing a layout on a local control computer, wherein said layout contains at least one data source that is located remotely from said local control computer; b) accessing said at least one data source from a source computer (paragraph.25); and c) causing said at least one data source to be displayed on said large scale display, wherein said large scale display is located remotely from said local control computer (paragraph.18, lines 18-29).
